Annual Activity Report

For the period Sep. 1, 2007 – Aug. 31, 2008

Chania, Crete, Nov. 21, 2008

Kouretes is our Department's robotic soccer team, led by Assistant Professor Michail Lagoudakis (ECE), with contributions by Assistant Professor N. Vlassis (DPEM). Kouretes came back from RoboCup 2008 in Suzhou, China with two trophies! **1st** place in the SPL-MSRS league and **3rd** place in the SPL-Nao league.

Message from the Chair

Dear Colleague,

The Department of Electronic and Computer Engineering (ECE) of the Technical University of Crete (TUC) was founded in 1983 and admitted its first incoming class of 30 students in 1990. Since then the Department has grown substantially; the incoming freshman class is around 115 students, and the department is staffed with 22 faculty members, while another 7 await appointment. Our Department is organized in four Divisions: Electronics and Computer Architecture, Computer Science, Systems, and Telecommunications.

Our graduate program was established in 1993, and is research-based with emphasis on original results and publications rather than extensive coursework. Many of our graduates have pursued studies and careers in Greece or abroad and currently serve as faculty members at Universities, researchers at research laboratories, and professional engineers in Greece, Europe, and the U.S.A.

The departmental personnel are highly-qualified. The majority of the faculty members have earned their Ph.D. degrees from top universities around the world and many have pursued careers as faculty members abroad before joining the ECE Department. The current high level of scientific activity, peer-reviewed publications, and competitive research funding of the ECE Department are due to the talent and the relentless efforts of the faculty, and their close collaboration with the staff and students of the Department. The international recognition of their efforts is reflected in numerous publications in top scientific journals and international conferences, several best paper awards, participation in top journal editorial boards and top international conference program committees, leadership in conference organization etc.

While the Department's performance is very good, there is always room for improvement. A very useful tool towards this end is the Annual Activity Report (AAR), a process instituted in our department in 2005. This is the Department's fourth AAR, covering the period from Sep. 1, 2007 to Aug. 31, 2008. It is our hope that the Annual Activity Reports document the results of our research efforts, and help improve the quality of our Department. Your feedback is most welcome.

Outreach – popularizing science & engineering

Kouretes made headlines at **Robocup 2007**, Atlanta, GA, U.S.A. (Kouretes ranked 2nd in the Microsoft Simulation Challenge) and **Robocup 2008**, Suzhou, China (Kouretes ranked 1st in the SPL-MSRS, and 3rd in the SPL-Nao). Kouretes made headlines in the national media this year, with special articles ([To Vima](#), [Kathimerini](#)) and live TV coverage ([NET – the Greek public TV network](#), and [MEGA channel](#)). Kouretes is led by Assistant Professor Michail Lagoudakis. Such publicity does wonders in exciting present and prospective students.

Because my field is rapidly changing, international conferences reflect the state of the art much more

than archival journals and I have deliberately given the weight of my reviewing and committee activity on such conferences.
